<b>2 [September 1, 2022] Changes in the Free Trial Specifications of the HSS Basic Edition (Pay-per-use).....</b>	<b>3</b>

# 1 [June 30, 2023] Huawei Cloud Host Security Service (New Version) Upgrade Notice

---

Dear customer,

Huawei Cloud Host Security Service (HSS) has been upgraded to 2.0. HSS (New) provides enhanced capabilities. To better protect your systems, you are advised to upgrade HSS as soon as possible. For details, see [Upgrading the Agent](#). After the upgrade, the original quota can still be used and no extra fee is charged.

HSS (New) provides:

- A new agent that is more secure, reliable, and stable.
- Anti-ransomware solutions (dynamic bait files, and backup and restoration)
- Runtime application self-protection (RASP)
- Application vulnerability detection
- DJCP MLPS 2.0 L3 baseline check
- Custom security report
- A new and improved GUI

#### **Upgrade impacts:**

1. The HSS agent upgrade does not require server restart. It occupies only a few server resources and has little impact on services.
2. Currently, only HSS (New) quotas can be purchased. The quotas can be used only on the HSS (New) console.
3. The features of HSS (Old) will no longer be maintained or updated, but the existing protection capabilities will be retained. If you use the HSS (Old) agent, you can still use HSS (Old) functions. To improve overall security capabilities, you are advised to upgrade the agent.

If you have any questions or suggestions, please submit a service ticket or call us at +86-950-808. We apologize for any inconvenience and appreciate your understanding.

Thank you for using Huawei Cloud.

# 2 [September 1, 2022] Changes in the Free Trial Specifications of the HSS Basic Edition (Pay-per-use)

---

Dear Huawei Cloud customers,

Huawei Cloud will change the free trial period of the HSS basic edition (pay-per-use) at 00:00:00 on September 01, 2022 (GMT+08:00). After the change, the free trial period for each Elastic Cloud Server (ECS) is 30 days.

You can enable the HSS basic edition for free when purchasing an ECS.

If you have enabled the HSS basic edition (pay-per-use) before September 01, 2022 (GMT+08:00), the free period will end at 23:59 on September 30, 2022 (GMT+08:00). **After the free trial expires, you can still use HSS to check server security once a month. This feature will be available in September.**

Please notice that after the free trial period expires, the Huawei Cloud basic edition quotas (pay-per-use) will be automatically released, and HSS will not protect your servers.

If you want to retain or upgrade HSS security capabilities, you are advised to purchase HSS. So far, you can purchase the enterprise, premium, and Web Tamper Protection (WTP) editions. The basic edition will be available for purchase soon. For details about the protection capabilities of the HSS editions, see [Editions](#).

The basic edition will be enhanced to provide more functions, including vulnerability detection and intrusion detection.

If you have any questions or suggestions, please submit a service ticket.

Thank you for using Huawei Cloud.
