# 1 Quick Start

---

This document helps you get started with CodeArts Check. For example, a new company can use CodeArts Check after performing routine operation configurations.

## Process

This diagram describes the basic operation process of CodeArts Check, helping you quickly get started.

## Procedures

### Step 1 Create a code check task.

On the CodeArts homepage, choose **Service > CodeArts Check**. Click **Create Task** to create a check task.

When creating a task, you can obtain code from a code repository of the associated project.

### Step 2 Execute the code check task.

After a CodeArts Check task is created, the check details page is displayed. Click **Start Check** to execute the task.

### Step 3 View the code check report.

After the check is complete, click the check task name. On the displayed page, you can click **Logs, Metrics, Issues, and Overview** to view details.
