1 Adding Tags to Cloud Resources..... 1

1 Adding Tags to Cloud Resources

Constraints

- Each resource supports up to 10 key-value pairs.
- For each resource, each tag key must be unique, and each tag key can have only one tag value.
- A tag key can contain a maximum of 36 characters, including digits, letters, underscores (_), and hyphens (-).
- A tag value can contain a maximum of 43 characters, including digits, letters, underscores (_), periods (.), and hyphens (-).

Adding Tags on the TMS Console

You can tag your resources using TMS to centrally classify and manage your resources.

1. Log in to the [management console](#).
2. Set the resource search criteria.
For details, see [Searching for Cloud Resources](#).
3. Click **Search**.
4. In the **Search Result** list, select the cloud resource to which you want to add tags and click **Manage Tag** in the upper left corner.
5. In the **Add Tag** area, enter a tag key and a tag value.
You can also directly select existing tags from the drop-down list.
6. Click **OK**.

Adding Tags on the Consoles of Other Cloud Services

The following procedure shows how you add tags on the service console. This procedure may differ slightly from service to service.

1. Log in to [Huawei Cloud console](#).
2. Under **Service List**, select a target service.
3. On the displayed service console, click the resource to which you want to add a tag.

4. Select the **Tags** tab.
5. Click **Add Tag**.
6. In the displayed **Add Tag** dialog box, enter a tag key and a tag value.
You can also directly select predefined tags from the drop-down list.
7. Click **OK**.

Checking Whether a Tag Takes Effect

If you have added a tag to a resource, you can check whether the tag takes effect by searching for the resource with the added tag.

1. Log in to the [management console](#).
2. Set the resource search criteria.
Set the region and resource type as needed.
For **Resource Tag**, enter the tag that has been added to the resource.
3. Click **Search**.
The resource is displayed in the **Search Result** list.
