5.1.1.1 Organization Members, Roles, and Permissions

This section describes how to manage organization information and create roles and users.
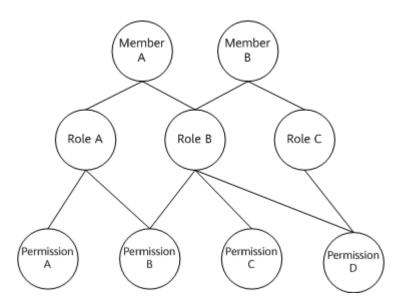

You can create user accounts for your employees and assign them specific roles and permissions.

📖 NOTE

- You must create user accounts and assign them different roles on the **Organization** > **Member Management** page. Do not use IAM to create or delete users, or there will be conflicts between the IAM and Partner Center.
- User accounts that are used for accessing Partner Center must be created in **Member Management** of Partner Center. The IAM users created in the IAM console of Huawei Cloud cannot access Partner Center.

Organization Members, Roles, and Permissions

A role is a set of permissions that are combined as needed. Each role has specific permissions and an organization member can have different roles.
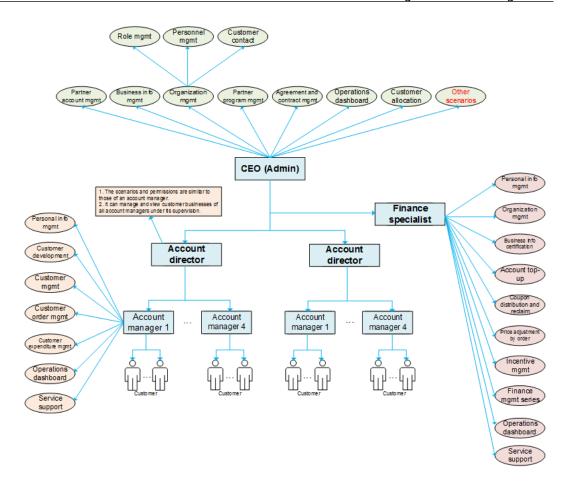

Example:

If organization member A has role A and role A has permission B (the role creation permission), organization member A has the permission to create roles.

5.1.1.2 Organization Member and Role Configuration Example

Company A is a partner of Huawei Cloud, and it has the following major management personnel:

One CEO, one finance specialist, two account directors (each managing four account managers), and eight account managers. The CEO has the partner account operation permissions. The finance specialist, account directors, and account managers are the organization members of company A and have their respective accounts with according permissions.

The following describes how to create accounts for the organization members in company A, as well as configure the roles and permissions accordingly.

- The Partner Center system has the following preset roles and their according permissions: administrator, finance specialist, account directors, and account managers. If the preset roles and permissions meet the permission application requirements of company A, create accounts and configure the roles and permissions for the organization members of company A by following instructions provided in **Creating a User**.

9 Cloud Solution Providers

9.1 Transaction Models

9.1.1 Overview

Huawei Cloud solution providers are qualified to resell Huawei Cloud to end customers. Cloud solution providers can provide customers with products and services based on Huawei Cloud and obtain benefits and incentives from Huawei Cloud.

Cloud solution providers can develop customers in reseller model.

- Reseller model: Associated customers deal with cloud solution providers (cloud solution providers issue invoices to and collect payments from customers), and Huawei Cloud makes a settlement with cloud solution providers (Huawei Cloud issues invoices to and collects payments from cloud solution providers).

9.1.2 Reseller Model

Developing Customers

If a cloud solution provider associates customers in the reseller model, the cloud solution provider can provide the customers with products and services based on Huawei Cloud. For details about how cloud solution providers develop customers, see **Customer Development**.

Controlling the Budget

Cloud solution providers can **set a monthly budget for their customers**. In this way, they can manage customer's monthly expenditures to reasonably set a budget.

The budget is calculated based on the prices listed on the official Huawei Cloud website. The budget will restore in the next month. Cloud solution providers can view their customers' monthly budget usage on the customer details page.

If the expenditure of a customer exceeds a certain percentage of its monthly budget, the cloud solution provider will receive an alert notification. The partner can **adjust customer's monthly budget** or **freeze the customer account**. After the account is frozen, the customer cannot buy, renew, or change resources, and provisioned resources may become unavailable, but still incur fees.

If a customer's expenditure exceeds the budget, Huawei Cloud will restrict customer's purchase of yearly/monthly and reserved instances, but not the provisioning of pay-per-use resources. To restrict the provisioning of pay-per-use resources, cloud solution providers need to freeze customer's account. For details, see **Freezing a Customer**.

 NOTE

> After a customer associates with a partner, the customer account is frozen by default. The customer cannot purchase products or services until the partner unfreezes the customer account and sets a monthly budget for the customer.

Purchasing Huawei Cloud Products

The expenditures displayed on Billing Center for a cloud solution provider's customer are calculated based on list prices. These figures are used as a reference for resource usage. They do not represent the money spent. The actual expenditures of a customer are provided in the customer bills that are generated by their solution provider for settlement.

Querying Customer Expenditures

After customers purchase Huawei Cloud products and services, their partners can query the customers' expenditures in the partner center.

For details, see **Viewing a Customer's Orders** and **Viewing Customer Expenditures**.

Customers expenditure summary is not the partner bill and cannot be used as the basis for partners' settlement, payment, or billing.

 NOTE

> - The expenditure summary data has a latency. The actual expenditure data is subject to the expenditure details.
> - The expenditure summary and details are collected based on the time of UTC+00:00.
> - The expenditure summary and details do not include the tax.

Partner Bills

Before 12:00 (UTC+00:00) on the fifth day of each month, Huawei Cloud generates partner bills, bill details, and invoices of the last month. Partners settle the bills with Huawei Cloud.

For details about partner bill fields, see **Partner Bill Description**. For details about how partners pay bills, see **Repayment**.

 NOTE

> - Only after a customer is associated with a partner in the reseller model, its expenditures can be rolled into the partner's bill.

The monthly bill details of a cloud solution provider contain the expenditure details of each customer. The partner can rate its customers based on the bill details and generate the bills for, settle with, and generate the invoices for the customers associated in the reseller model.

The settlement rules between a cloud solution provider and their customers are defined by the cloud solution provider.

Revenues and Incentives

Huawei Cloud calculates the revenues of a cloud solution provider based on the incentive policy and distributes incentives to the cloud solution provider accordingly. For details about the partner revenue and incentive policies, consult the ecosystem manager of the region.

For details about how a cloud solution provider applies for its incentives, see **Applying to Issue Incentive Earnings**.

Table 9-1 Account of the cloud solution provider

Account	Description
Account	Partner can pay bills for their accounts. For details, see **Payment**.

9.4.1.2 Partner Bill Description

A partner bill is generated when the partner consumes resources on Huawei Cloud. The partner can pay or apply for an invoice based on the bill. Partners' expenditures on Huawei Cloud comes from their customers associated in the reseller model.

◻ NOTE

You are responsible for billing and invoicing of your customers associated in the reseller model. Huawei Cloud does not directly provide related services to your customers.

Calculation Rule of the Amount Due

The calculation rule is as follows:

Amount Due = Settlement amount - Coupons used + Tax

◻ NOTE

The tax calculation rule is determined based on the partner registration area. The tax includes VAT, CGST, SGST, or IGST. The contained parts vary according to the region.

Bill Precision

- Before June 2021, bills on resources for long-term use (for example, pay-per-use resources or spot instances) were settled by hour, day, or month. The settled amount was accurate to the second decimal place, while the remaining decimal places were directly truncated.
- From June to July in 2021, the amount of bills on resources for long-term use (for example, pay-per-use resources or spot instances) is rounded off and summarized to obtain the total amount.

- From August 2021, the amounts during bill generation are no longer truncated. Only the total amount shown in the monthly bill is rounded off to the second decimal place. The following is an example:

  Expenditures ($8,083.8494925) + Refunds (-$853.8495) + Adjustments (-$37.9425) = $7192.0574925 (rounded off to the second decimal place $7,192.06)

  – On the **Financial Information** > **Partner Bills** > **Bills** > **By Product** or **By Customer** page, the exact amount is displayed.

  – On the **Financial Information** > **Coupons** page, the cash coupon balance is accurate to two decimal places.

  – The amount of coupons used in bill run is accurate to eight decimal places.

  – The amounts of list price, discounted amount, amount due, cash payment, cash coupons used, and monthly settlement on the **Customer Business** > **Customer Expenditure** page are accurate to eight decimal places.

  – The amount of **Current Estimate** displayed on the **Customers** > **Customer Management** page is accurate to eight decimal places. **Current Estimate** will be displayed for reseller customers if they are assigned a monthly budget.

  – The amount on the **Operations Statistics** > **Expenditures** page is rounded to the nearest hundredth. The amounts in the related APIs and exported expenditures are accurate to eight decimal places.

10.2.4 Financial Information

10.2.4.1 Bill Management

10.2.4.1.1 Partner Bill Description

A bill is generated for the resource consumption of a partner on Huawei Cloud, and the partner needs to request an invoice and pay for the bill. Expenditures of a distributor on Huawei Cloud come from the customers associated with its resellers.

📖 **NOTE**

In the Reseller model, the reseller is responsible for the customer's billing and invoicing, and Huawei Cloud does not directly provide related services to the customers.

Calculation Rule of the Amount Due

The calculation rule is as follows:

Amount Due = Settlement amount - Coupons used + Tax

📖 **NOTE**

The tax calculation rule is determined based on the partner registration area. The tax includes VAT, CGST, SGST, or IGST. The contained parts vary according to the region.

Bill Precision

- Before June 2021, bills on resources for long-term use (for example, pay-per-use resources or spot instances) were settled by hour, day, or month. The settled amount was accurate to the second decimal place, while the remaining decimal places were directly truncated.

- From June to July in 2021, the amount of bills on resources for long-term use (for example, pay-per-use resources or spot instances) is rounded off and summarized to obtain the total amount.

- From August 2021, the amounts during bill generation are no longer truncated. Only the total amount shown in the monthly bill is rounded off to the second decimal place. The following is an example:

  Expenditures ($8,083.8494925) + Refunds (-$853.8495) + Adjustments (-$37.9425) = $7192.0574925 (rounded off to the second decimal place $7,192.06)

- On the **By Product** or **By Customer** tab of the **Financial Information** > **Partner Bills** > **Bills** page, the exact amount is displayed.

- On the **Financial Information** > **Coupons** page, cash coupon balance is accurate to two decimal places.

- The amount of coupons used in bill run is accurate to eight decimal places.

- The amounts of list price, discounted amount, amount due, cash payment, cash coupons used, and monthly settlement on the **Customers** > **Customer Expenditure** page are accurate to eight decimal places.

- The **Current Estimate** displayed on the **Customers** > **Customer Management** > **Set Budget** page is accurate to eight decimal places.

- The amount on the **Operations Statistics** > **Expenditures** page is rounded to the nearest hundredth. The amounts in the related APIs and exported expenditures are accurate to eight decimal places.

10.3 Distributor's Resellers

10.3.1 Transaction Model

10.3.1.1 Overview

A Huawei Cloud reseller is developed and managed by a Huawei Cloud distributor. Resellers will be responsible for presales consulting, product selling, and providing related services.

Resellers can develop customers in the reseller model.

In the reseller model, resellers settle with their associated customers and issues invoices to and collects payments from them. Huawei Cloud makes a settlement with, issues invoices to, and collects payments from the resellers' distributors.

Huawei Cloud will not engage itself in the settlement of the resellers. The settlement rules between a reseller and their associated distributor are defined by the reseller and the distributor.

The following describes the reseller model in detail.

10.3.1.2 Reseller Model

Developing Customers

A reseller can develop customers and sell Huawei Cloud products and services to them. For details about how to develop customers, see **Customer Development**.

Controlling the Budget

A distributor can set monthly budgets for their resellers' customers to control customer expenditures.

The budget is calculated based on the prices listed on the official Huawei Cloud website. The budget will restore in the next month. Distributors can view their customers' monthly budget usage on the customer details page.

Distributors and resellers will receive alerts if their customers' budget usage exceeds a certain limit. Resellers can ask their distributors to adjust monthly budgets or freeze the accounts for their customers. If a customer's account is frozen, the customer cannot buy, renew, or change resources, and provisioned resources may become unavailable, but still incur fees.

If a customer uses up their budget, Huawei Cloud will automatically restrict the customer from purchasing yearly/monthly products and reserved instances. However, the customer can still purchase pay-per-use resources. A distributor can further restrict a customer from purchasing pay-per-use resources.

📖 **NOTE**

- After a customer is associated with a reseller, the customer account is frozen by default. The customer cannot purchase products or services until the distributor sets a monthly budget and unfreezes the account for the customer.
- A reseller needs authorization from their distributor to set budgets, freeze or unfreeze accounts, and freeze or unfreeze resources for their customers. For details, see **Setting Account Freezing and Budget Setting Permissions for Resellers**.

Purchasing Huawei Cloud Products

The expenditures displayed on Billing Center for your customer are calculated based on list prices. These figures are used as a reference for cloud service resource usage. They do not represent the money spent. The actual payment amount of a customer is determined by you and your customers.

Querying Customer Expenditures

Resellers can check their customers' expenditures in Partner center.

For details, see **Viewing a Customer's Orders** and **Customer Expenditures**.

Customers expenditure summary is not the partner bill and cannot be used as the basis for partners' settlement, payment, or billing.

📖 **NOTE**

- The expenditure summary data has a latency. The actual expenditure data is subject to the expenditure details.
- The expenditure summary and details are collected based on Beijing time (GMT+08:00).
- The expenditure summary and details do not include the tax.
- Cash coupons will be deducted from the customer account before the bill of the customer's pay-per-use product fees is generated at the end of the month. The deducted cash coupons calculated before the settlement contain only the cash coupons deducted when the order is paid.

10.3.2 Leads and Opportunities

10.3.2.1 Customer Development

10.3.2.1.1 Pre-registering Customers

Customer pre-registration is a mechanism provided by Huawei Cloud for resellers to register customers in advance to seize customer development opportunities. This mechanism prevents conflicts between resellers and between resellers and Huawei Cloud.

The partner needs to add mobile numbers or email addresses on the **Partner Information** > **Basic Information** > **Account Information** tab in the Partner Center before preregistering customers.
- When preregistering a customer, enter the email address the customer uses to register its account.
