1 What's New

The following tables describe the features released in each ASM version and corresponding documentation updates.

July 2022

No.	Feature	Description	Phase	Documentation
1	This is the first official release. ASM provides non-intrusive traffic management and grayscale release capabilities.	ASM is a service mesh platform developed by Huawei Cloud based on Istio. It is seamlessly interconnected with CCE, an enterprise-grade Kubernetes cluster service, and provides out-of-the-box usability, enhanced reliability, and visualized management.	Commercial use	What Is Application Service Mesh (ASM)?
