1 What's New

The following tables describe the features released in each CSS version and corresponding documentation updates. New features will be successively released in each region.

March 2023

No.	Feature	Description	Phase	Document
1	Changing the Security Group of an Elasticsearch Cluster	After an Elasticsearch cluster is created, you can modify its security group.	Commercial use	Viewing Cluster Information
2	Independent Master/Client Nodes	If the workloads on the data plane of a cluster increase, you can dynamically scale the cluster by adding master or client nodes.	Commercial use	Adding Master/Client Nodes
3	Changing the Security Mode in One Click	After a cluster is created, you can change its security mode in one click.	Commercial use	Changing the Security Mode
4	Replacing a Specified Node	If a node in the cluster is faulty, you can create a new node with the same specifications to replace it.	Commercial use	Replacing a Specified Node
5	VPC endpoint service	CSS allows you to access clusters using private domain names.	Commercial use	VPC Endpoint Service

August 2022

No.	Feature	Description	Phase	Document
