# 3 Partner Information Management

---

## 3.1 Business Information Authentication

### 3.1.1 What Is the Relationship Between the Country/Region Specified When the Partner Account Is Registered and the Registered Country/Region of the Partner Legal Entity? Can They Be Different?

In principle, they must be kept consistent. For example, if a company is registered as a legal entity in Hong Kong, China, you must specify the registered country/region to Hong Kong. If they are not consistent, key services, such as tax calculation and bill generation, will be affected.

### 3.1.2 Can I Enter My Company Name in a Language Other Than Chinese or English During Business Information Certification?

HUAWEI CLOUD supports company names only in Chinese or English in business information certification. If you enter a Chinese company name and want to settle your incentives in US dollars, ensure that your bank account is in English.

### 3.1.3 Do All Cloud Solution Providers Need to Complete Business Information Authentication?

Yes. All cloud solution providers need to complete business information authentication.

### 3.1.4 What Are the Differences Between Solution Partner Certification and Payment Information Authentication?

HUAWEI CLOUD provides two types of partner certification: solution partner certification and payment information authentication. The latter requires partners

to provide bank and tax affairs information. Partners can gain their incentive earnings only after they complete both the types of certification. Partners can apply for the both types of certification together or separately.

### **3.1.5 How Can I Choose the Tax Rate for Payment Information Authentication in the HUAWEI CLOUD Partner Center?**

Partners can choose the tax rate based on the tax regulations in their country. Specifically, the tax rate must be the value-added tax (VAT) rate that the partners use in applying for the service invoices from HUAWEI CLOUD. The service invoices are used for HUAWEI CLOUD distribute the partners' incentive earnings. The initial incentive data does not include the tax. After the partner selects the correct tax rate, HUAWEI CLOUD will calculate the total (original incentives plus tax) and pays it to the partner.

### **3.1.6 What Should Partners Do If Payment Information Authentication Failed When Bank Information Is Correct?**

This may be because the bank information provided by partners is not in the country where the bank supported in the current version is located. In this case, partners can consult HUAWEI CLOUD customer service or the ecosystem manager and contact support personnel to handle the problem offline. (Partners need to provide a bank confirmation letter.)

### **3.1.7 What Can I Do If the Bank Information Is Incorrect or Has Changed?**

Partners need to specify correct bank information. If the bank information is incorrect, payment may fail. You need to modify or update the bank information and submit it to the system again. After the information is updated, payment can be continued.

### **3.1.8 Why Is the Associated Information Questionnaire Is Required During Accreditation?**

Huawei needs this information to better manage partners and suppliers. Partners should fill in the questionnaire honestly.

### **3.1.9 Why Is Payment Information Authentication Delayed?**

Partners are certified as suppliers because they have cooperated with Huawei in procurement, and their information, which is different from the payment information submitted to CBC, exists in the Huawei ERP system. After Huawei procurement personnel add related information to the ERP system, the payment information authentication will pass. It takes about one to two weeks for approval after procurement personnel add the information.

#### 7.1.1.4 What Are the Principles for Handling Duplicate Opportunities?

Opportunity duplication handling principle: When multiple partner-originated opportunities (POs) or Huawei-originated opportunities (HOs) are repeated, only one opportunity can be verified.

1. If an opportunity is submitted by multiple partners, whichever the opportunity gets verified and approved first will be accepted by Huawei Cloud.
2. If an HO conflicts with a PO, time is the decisive factor, and the HO is subject to the submission time while the PO is subject to the time when it is verified and approved.

BD is the primary owner for handling duplicate opportunities.

#### 7.1.1.5 What Is the Time Limit for the Verification of Partner-Originated Opportunities (POs)?

For those opportunities that have been verified and approved, their verification must comply with the rules for opportunity duplication handling and opportunity qualification. The service level agreement (SLA) for opportunity verification is 10 working days. The opportunity will be rejected if the verification is not completed within the 10 working days.

#### 7.1.1.6 Is It Necessary to Update the Opportunities I Shared After They Are Verified and Approved?

It is necessary to update the opportunities after they are verified and approved. The **Update** button will be available when an opportunity is verified and approved. You can develop businesses with Huawei Cloud through information collaboration, joint sales, and joint services based on this opportunity.

### 7.1.2 HOs

#### 7.1.2.1 How Do I Get Opportunities Shared by Huawei Cloud?

You will be eligible to get opportunities shared by Huawei Cloud when you keep sharing and regularly updating opportunities in Partner Center after joining the PCE program and have entered the competency differentiation stage of a development path, or you have entered the role validation stage of the development path and have three partner-originated opportunities (POs) that have been closed during the last 12 months.

#### 7.1.2.2 What Should I Keep In Mind When Accepting an Opportunity Shared by Huawei Cloud?

The SLA for you to accept an opportunity shared by Huawei Cloud is three working days. The opportunity will be rejected if you do not accept it within the specified time period. The **Update** button will be available when an opportunity is verified and approved. You can develop businesses with Huawei Cloud through information collaboration, joint sales, and joint services based on this opportunity.

# 8 Cloud Solution Providers

---

## 8.1 Partner Policies

### 8.1.1 What Is Cloud Solution Provider Program?

Designed for system integrators (SIs), strategic consulting firms, solution providers, agents, managed service providers (MSPs), value-added resellers (VARs), and carrier partners, the cloud solution provider program can use Huawei Cloud products as a portion of its differentiated solution and resell these products to end customers.

### 8.1.2 What Is the Revenue of a Cloud Solution Provider? How Do I Calculate the Revenue?

If a partner resells Huawei Cloud products or services to a customer or indirectly drives the sales of Huawei Cloud products or services, the payment for the resources used by the customer on Huawei Cloud is the revenue calculation basis. The cash revenue generated from the direct or indirect sales of Huawei Cloud products or services will be counted into the partner's revenue, which is an important metric for determining the partner's incentives.

### 8.1.3 What Are the Incentives for a Cloud Solution Provider?

Huawei Cloud gives incentives to cloud solution providers based on their revenues and value-added contributions. Incentives include revenue-based incentives and special incentives meeting certain requirements.

### 8.1.4 Are Cloud Resources Used by Cloud Solution Providers Themselves Included in the Sales Revenue?

The account of cloud solution providers cannot be used to purchase cloud resources. To purchase cloud resources, a partner can register a new Huawei Cloud account using the same company as that for registering a cloud solution provider account and then associate the Huawei Cloud account to the cloud solution

provider account. Then, the cash expenditures generated by this Huawei Cloud account are counted into partner's sales revenue.

### **8.1.5 Is the Consumption Using Coupons Issued by HUAWEI CLOUD Included in Sales Revenue?**

This part is not counted.

### **8.1.6 Is Customers' Consumption for New Resources Differentiated from That for Renewal in Partners' Revenue?**

No. The two parts are not differentiated.

### **8.1.7 How Can Partners Apply for Additional POC Test Coupons?**

Contact the local HUAWEI CLOUD ecosystem manager.

### **8.1.8 How Long Is the Validity Period of the Referral and Reseller Models?**

Only one model can be selected for a customer. The model is permanently valid after the customer is associated.

### **8.1.9 What Is the Transaction Mode for the Referral and Reseller Model?**

Referral model: A customer signs a contract with Huawei Cloud. Huawei Cloud is responsible for the customer's contracts, billing, and invoices, and the customer pays to Huawei Cloud. The customer needs to bind a credit card to purchase cloud services, and the partner takes the incentive.

Reseller model: A customer transacts with a partner, and the partner transacts with Huawei Cloud. The partner is responsible for the customer's budget setting, contracts, billing, and invoices. The customer does not need to bind a credit card. The bills and payment of the customer are paid by the partner.

### **8.1.10 How Do Partners Set Discounts for Customers?**

Referral model: Partners can select a customer in the Partner Center and set a discount within the authorized scope set by HUAWEI CLOUD for the customer.

Reseller model: HUAWEI CLOUD does not control the transaction price between partners and customers. Therefore, discounts cannot be set in the Partner Center.

### **8.1.11 What Does the Account Information, Amount Due, and Account Balance of the Partner Center Mean?**

**Amount Due:** indicates the expenses that a partner should pay to Huawei (summarizes the cloud resource usage of the customers associated with the partner and the consumption calculated based on the settlement price between the partner and HUAWEI CLOUD).

**Account Balance:** indicates the balance of a partner's account. HUAWEI CLOUD deducts fees from the Account Balance after the monthly partner Amount Due is calculated.

### **8.1.12 Does a Cloud Solution Provider Need a Product Authorization to Sell Huawei Cloud Products and Services?**

No, the cloud solution provider does not need product authorization. Cloud solution providers can sell all products listed on the official website of the Huawei Cloud (international website) in any regions around the world.

### **8.1.13 Does Each Country Has One HUAWEI CLOUD Partner Policy Designed?**

No. There are only two types of HUAWEI CLOUD partner policies: one type is for the Chinese mainland, and the other type is for markets outside Chinese mainland.

Partners can register and certify on HUAWEI CLOUD in any place, and sell HUAWEI CLOUD global resources based on the partner policy of the registration place. The settlement price, discount, and rebate are subject to the pricing policy of the region.

### **8.1.14 Do Cloud Solution Providers Need to Make Payment to Huawei Cloud in Advance for Overstock?**

Cloud solution providers do not need to make payment to Huawei Cloud in advance for overstock. Huawei Cloud has different annual revenue requirements for different tiers of cloud solution providers. The cloud solution providers will be upgraded or downgraded when their annual revenue meets the corresponding requirements. Huawei Cloud customers outside the Chinese mainland use the postpaid mode. Huawei Cloud grants credits to partners based on their customers' conditions.

### **8.1.15 Does a Partner Need to Provide Services for Customers Associated in the Referral Model?**

If a customer associates with a partner in the Referral mode, the partner needs to provide support service for the customer.

### **8.1.16 Does HUAWEI CLOUD Set Budgets for Partners? What Is the Relationship Between This Function and Budget Setting by Partners for Reseller Customers?**

- HUAWEI CLOUD sets a consumption quota for a partner based on the partner tier. The quota granted by HUAWEI CLOUD to the partner does not relate to the monthly budget set by the partner for its customers. If the partner's consumption exceeds the quota set by HUAWEI CLOUD, HUAWEI CLOUD will notify the partner of repaying the money immediately, but will not perform any operations on the cloud services used by partner's reseller customers.

- A partner sets the monthly budget for its reseller customers is to manage the cloud resource usage of the customers. HUAWEI CLOUD compares the customer's expenditure at the official price with the monthly budget. If the customer's expenditure exceeds a certain proportion of the budget, the partner will receive a notification. The partner can adjust the monthly budget or freeze the account of the customer. Once the account is frozen, the customer cannot purchase, renew, or change resources, and provisioned resources may become unavailable, but still incur fees. The customer budget will restore in next month.

- Select a partner program and click **View Details** to view the program details.
- Select a partner program and click **Download Certificate** to download the program certificate.

## 8.2.3 How Can I Become a Huawei Cloud Solution Provider?

If you have registered a Huawei Cloud account and the account has no historical consumption and no credit card account is linked, you can log in to Huawei Cloud and visit the [Partners](#) page to apply for joining HCPN first. After that you can apply for joining the Solution Partner Program.

If you do not have a Huawei Cloud account, visit Huawei Cloud official website for account registering (no need to link a credit card account) and then visit [Partners](#) page to apply to join HCPN first. After that, you can apply for joining the Solution Partner Program.

You do not need to bind a credit card. You can visit the [Partner](#) page to directly join the HCPN Solution Partner Program.

## 8.2.5 How Do I Join the HCPN Solution Partner Program When I Already Have My HUAWEI CLOUD Account Bound with a Credit Card?

Joining the Solution Partner Program does not need you to bind a credit card. You need to register a new account on the [Partner](#) page.

## 8.2.6 How Do I Join HCPN Solution Partner Program When My Account Has Purchased HUAWEI CLOUD Services?

You need to register a new account on the [Partner](#) page.

## 8.2.7 Why Can't I Purchase HUAWEI CLOUD Services Using My Solution Partner Account?

A Solution Partner account is used for managing services. It cannot purchase HUAWEI CLOUD services.

## 8.2.8 How Does a Solution Partner Try HUAWEI CLOUD Services?

You can register a common HUAWEI CLOUD account. After you bind an email and phone number, complete the account information, and configure a payment method, you can try and experience HUAWEI CLOUD services.

## 8.2.9 Can a Partner Account Be Deregistered?

A HUAWEI CLOUD account that has been added to any partner program cannot be deregistered.

## 8.2.10 Can a Partner Registered in Country A Register as a HUAWEI CLOUD Solution Partner in Country B?

In principle, the registration place is not limited. However, due to the restrictions of commercial, legal, and financial tax regulations of each country, partners are generally allowed to register as HUAWEI CLOUD Solution Partner in the country where their companies are registered to support HUAWEI CLOUD sales and trading.

## 8.2.11 Why Cannot I Bind a Credit Card to My Account If I Want to Become a Solution Partner?

After a partner becomes a solution partner, its original HUAWEI CLOUD account becomes a Solution Partner account. A Solution Partner account cannot be used to purchase or use cloud resources. Therefore, if the partner's account has been bound to a credit card and has cloud resources provisioned, the partner can apply to become a solution partner only after all the resources are disabled and unsubscribed from.

To disable and unsubscribe from the cloud services, the partner needs to submit a service ticket. For certain cloud services, such as DNS, SMN, and some services in the OBT stage, it takes one to two days to disable the services after the service ticket is submitted. Therefore, it will take long time for the partner to disable the provisioned cloud services. To avoid these situations, the partner cannot bind a credit card to its account if it wants to become a solution partner.

## 8.2.12 Can I Bind a Bank Card of Country B to an Account Registered in Country A?

Yes, you can bind a bank card of country B to an account registered in country A.

## 8.2.13 When Do I Need to Renew My Partner Program Certificates and How Do I Renew Them?

The renewal of the partner program certificates shall follow the partner program policy. The certificates can be automatically renewed on a specific date or you can choose to manually re-certificate or apply for joining the programs again. For details, contact your ecosystem manager (find your ecosystem manager on the **Overview** page in Partner Center).

## 8.3 Association and Disassociation

### 8.3.1 What Are the Precautions for Associating a Customer with a Partner?

#### Precautions

- A customer cannot be associated with a partner if the customer:
  - Registers with Huawei Cloud (China).

- Has been associated with another partner.
- Has signed a special contract with HUAWEI CLOUD, such as offline directly-signed contract, authorized telemarketing contract with discounts, or directly-signed special offer contract.
- Has registered for more than seven days or has cash expenditure records.
- Has unpaid bills.
- Has been associated with an enterprise master in the unified accounting mode with a resource account or a cloud account.
- A customer cannot be associated with a partner in reseller model if the customer:
  - Has signed a professional service contract with Huawei Cloud.
  - Has valid reserved instances (RIs).
  - Is using an enterprise member account.
  - Is using an enterprise master account that has independent accounting members.
- If a customer associates with a partner in reseller model, customer's cash coupons:
  - Can only be used to deduct customer's expenditures generated before the association.
- In the reseller model, if a customer invited has subscribed to resources before, you can **freeze the customer's account and resources** to prevent new fees from being generated by those resources.

## 8.3.2 How Can I Process Disassociation Requests from My Customers?

You can query association records or process disassociation requests in **Customers > Customer Management** of Partner Center.

### NOTE

Only partners with administrator permissions can process disassociation requests from customers.

### 8.3.3 How Can I Change the Association Type for My Customers?

You can submit a service ticket or contact the ecosystem manager to change the association type.

### 8.3.4 How Does a Partner Send Invitation Links?

A partner can pre-register potential customers first, and then send invitation links to them using either of the following methods:

- By email: An email with a registration link is sent to a potential customer inviting the potential customer to associate with the partner.
- By registration link or QR code: A registration link or QR code is sent to a potential customer by email.

For details, see [Pre-registering Customers](#).

### 8.3.5 How Does a Partner Create a QR Code for Developing Customers?

On the **Sales > Leads and Opportunities > Customer Development > By Link or QR Code** page of the Partner Center, cloud solution providers can create QR codes for developing customers.

### 8.3.6 Can Partners Pre-register a Project?

Cloud solution providers cannot pre-register projects but can pre-register customers in the Partner Center on Huawei Cloud.

### 8.3.7 What Can I Do If I Fail to Pre-register a Customer? If I Pre-register a Customer Successfully, Is the Customer Successfully Associated with Me?

- If you and the potential customer are in the same country, customer pre-registration is not mandatory for you to associate with the customer. You can directly send an invitation link or QR code to the potential customer.
- The customer pre-registration is to ensure that the potential customer will not be associated with other partners in a certain period of time. After you pre-

register the potential customer, other partners cannot pre-register or associate with the customer within 15 days, unless the customer uses a new email address. During this period, if the customer accepts the invitation from you, the customer is associated with you successfully.

- After a customer is successfully pre-registered by a partner, the customer needs to be associated with the partner. Huawei Cloud only recognizes that customers associated with a partner belong to the partner.

### 8.3.8 Do Huawei Cloud Solution Providers Need to Pre-Register Customer Projects When Developing Customers?

Huawei Cloud determines the revenue rebates and project ownership only based on the customer account bound to the project. Therefore, cloud solution providers do not need to pre-register customer projects when developing customers.

### 8.3.9 What Should I Enter for HUAWEI CLOUD BD When I Register an Opportunity?

When an ecosystem manager register an opportunity, enter the ecosystem manager employee ID for the **HUAWEI CLOUD BD** field. The **HUAWEI CLOUD Ecosystem Manager** and **HUAWEI CLOUD SA** fields are optional. If you specify these two fields, the target personnel can view the opportunity in the CRM system.

## 8.4 Consumption Quota

### 8.4.1 What Is a Consumption Quota? Why Do I Receive Consumption Quota Notifications? What Can I Do If My Consumption Quota Is Not Enough?

An consumption quota is a credit limit Huawei Cloud allocates to you. It specifies the maximum amount that you can owe to Huawei Cloud. If the quota is exceeded, your account will be restricted and all customers associated with you in the Reseller model will be restricted from purchases. It is not used for payment and does not indicate the exact amount you need to pay.

If you have used 80% more of your quota, you will receive a quota notification. You can view the quota details by choosing **Account Management > Basic Information > Consumption Quota** in the Partner Center. The quota notification function cannot be disabled. If your consumption quota has been used up, complete the payment in time to ensure that your customers can buy new resources. You will receive SMS and email reminders for a payment.

If your consumption quota is not enough, contact your ecosystem manager to increase the total consumption quota or repay money in advance.

### 8.4.2 How Do I Know the Usage of My Consumption Quota?

No special attention is required. If you are about to use up or have used up your consumption quota, HUAWEI CLOUD will automatically send you a notification. If

you want to know your quota details, choose **Partner Information > Basic Information** in the drop-down list of the account name in Partner Center and switch to the **Consumption Quota** tab.

## 8.5 Invoices

## 8.6 Incentive Settlement

### 8.6.1 What Are Partner's Revenue and Incentives?

- Revenue  
Revenue refers to the expenditures generated when customers associated with a cloud solution provider purchase Huawei Cloud services or KooGallery offerings. The expenditures do not include the payments made with the cash coupons, test coupons, and flexi-purchase coupons issued by Huawei Cloud, the payments for purchasing stored-value cards, or the payments made with stored-value cards.
- Incentives  
Incentives are provided by Huawei Cloud for cloud solution providers, including revenue-based basic rebates and special incentives that are granted when certain conditions are met.

### 8.6.2 When Does Huawei Start Reconciliation and Settle Incentives After Customers Purchase Cloud Services?

HUAWEI CLOUD provides incentives for partners by month, quarter, or year according to partner policies. Take monthly incentive as an example. The revenue incentive reconciliation with partners is initiated within five working days of the next month after a subscription. Partners are notified of issuing invoices to Huawei within five working days after the reconciliation if partners choose **Transfer to back account** or **Top up HUAWEI CLOUD account**. Huawei completes the payment within 30 calendar days after receiving the invoices. If partners choose **Exchange for cash coupons**, Huawei completes the payment within five working days after the reconciliation.

### 8.6.3 Where Can I View My Incentive Data?

You can log in to Partner Center and choose **Sales > Incentives > Incentive Management** in the menu on the top. Then, you can view the incentive data on the displayed page. The incentive data of the previous month is generated at the beginning of this month. On the **Confirm Incentives** tab, you can view the details online or export the bills to the local.

### 8.6.4 What Are the Differences Between Incentives from Reseller Customers and Incentives from Referral Customers?

According to HUAWEI CLOUD partner incentive policies, incentives from referral customers can be paid by month or quarter, and incentives from reseller

customers can be paid by quarter only. Partners can check the performance from reseller customers of each month, but the incentives are 0. The quarterly performance data from reseller customers will be displayed if the data reaches the quarterly rebate threshold, and the according incentives will be paid to the partners.

### 8.6.5 How Can I Confirm My Incentives? How Do I Map the Data to the Policies That I Enjoy?

- Confirming incentives from referral customers: Check the rebate type in the **Details** pane (rebate for list-price products or rebate for discounted products) and determine the formula used to calculate the rebate. Then, check the list price in the **Incentive Details** pane and calculate the rebate percentage based on the customer discount. The rebate amount is equal to the list price multiplies the rebate percentage. Partners can check whether the displayed data is correct.
- Confirming incentives from reseller customers: The monthly performance data is provided for check. The quarterly rebate data is generated only when the quarterly performance reaches the threshold. The monthly performance is equal to the list price multiplied by the settlement discount for reseller customers (excluding the consumptions paid by coupons), that is, the actual billed amount for reseller customers.
- After HUAWEI CLOUD notifies partners of reconciliation, partners can view detailed performance and incentive data in the partner center. If partners find that the data is incorrect before the reconciliation deadline, they can reject the reconciliation request, and the operations manager will follow up this rejected request. If partners have no doubt, the bill confirmation is automatically completed when the reconciliation period ends. If partners have any questions, they can contact the customer service or the ecosystem manager. If the operation is rejected, the settlement may be delayed.

### 8.6.6 How Does HUAWEI CLOUD Distribute (or Pay) the Incentive Earnings?

HUAWEI CLOUD provides three incentive distribution (or payment) methods, including **Transfer to bank account**, **Top up HUAWEI CLOUD account**, and **Exchange for cash coupons**.

- **Transfer to bank account:** Incentive earnings (including the tax) will be transferred to your authenticated bank account.
- **Top up HUAWEI CLOUD account:** Incentive earnings (including the tax) will be transferred to your HUAWEI CLOUD account.
- **Exchange for coupon coupons:** Incentive earnings (excluding the tax) can be exchanged for coupons.

### 8.6.7 When Do Partners Need to Issue Invoices to HUAWEI CLOUD?

Partners must issue invoices to HUAWEI CLOUD if they choose **Transfer to bank account** or **Top up HUAWEI CLOUD account**.

## 8.6.8 Why Cannot I View the Billing List Page?

The **Billing List** page can be viewed only after your payment information is authenticated and your payment application is successfully submitted to Huawei's payment system. Some partners submit payment information authentication after they are notified of incentives earnings, and apply for incentive earning distribution after their payment information is authenticated. The payment application fails because the payment system needs time to synchronize data and cannot identify that the authentication is successful. Partners can see view the **Billing List** page on the next day after the payment information passes the authentication.

## 8.6.9 Where Do I Mail the Invoices? What Else Is Required in Addition to the Invoices?

You can obtain the mail address in the billing notification email or on the **Billing List** page. In addition to the invoices, you need to also mail the billing list.

## 8.6.10 What Are the Incentive Invoice Requirements?

Solution partners registered in the following countries (South Korea, United Arab Emirates, Bahrain, South Africa, Chile, and Thailand) must provide Huawei tax number when issuing invoices. The cloud solution providers of other registration countries or regions do not need to provide Huawei tax ID. Your invoice may be rejected if you enter a wrong Huawei signing entity and/or Huawei tax number.

Country/ Region	Huawei Signing Entity	Tax ID of Huawei Signing Entity
South Korea	Huawei Services (Hong Kong) Co., Ltd.	Registration number: 145-80-01643

Others	Huawei Services (Hong Kong) Co., Ltd. Address: Room 03, 9/F, Tower 6, the Gateway No.9 Canton Road, Tsim Sha Tsui, Kowloon, Hong Kong	Tax ID, which is optional

### 8.6.11 What Is the Settlement Currency Used If I Choose Transfer to bank account?

The settlement currency used is the one entered by a partner during business information authentication.

### 8.6.12 What Tax Should Be Deducted When the Incentives Are Paid?

The tax is deducted according to the tax laws of the country or region involved in the payment, including but not limited to the withholding tax (WHT).

## 8.8.11 What Are the Impacts of Bill Run Mechanism Adjustment on Partners?

1. The total amount of a monthly bill on the **Sales > Financial Information > Partner Bills > Bills** page slightly increases when the third and later decimal places in the amount are not truncated.

The screenshot shows the 'Partner Bills' interface. At the top, it states: 'Partner bills include only your expenditures on HUAWEI CLOUD and do not include the expenditures of your referred customers. These bills serve as a basis for payment and invoicing.' Below this, there are instructions about the billing cycle (Beijing time, GMT+08:00) and a link to view the calculation method. The main section is titled 'Amount Due' and shows a calculation: \$11.95 USD = Unpaid Fees of the Latest Billing Month (\$0.00 USD) + Unpaid Fees of Previous Months (\$11.95 USD). There is a 'Repay' button. Below this, there's a 'Monthly Bills' section with 'Export Bills' and 'View Export' buttons, and a date selector set to '2021-05'. A message indicates that the user has not yet been billed for this month's expenditures, and the amount shown is just an estimate. At the bottom, there's a 'Bill Estimate' of \$0.00 USD and a table for 'Expenditures' and 'Refunds', both showing \$0.00 USD.

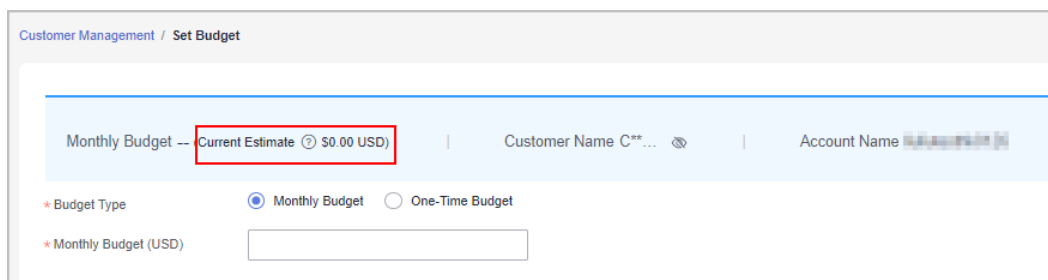

2. The amounts of expenditure summaries on the **Sales > Financial Information > Partner Bills > Bills > By Product** and **By Customer** pages have been rounded off, so there may be some discrepancies with the total amount on the **Bills** page. To view the accurate amount, you can export the bill in XLSX or CSV format to obtain the accurate amount that is accurate to eight decimal places.
3. Two decimal places are displayed for the balance of cash coupons on the **Sales > Financial Information > Coupons** page by default. If you hover your cursor over the balance amount, the amount accurate to eight decimal places is displayed.

The screenshot shows the 'Test Coupons' page. It has a search bar and a table with 23 coupons. The table columns are: Cash Coupon Name/ID, Balance(USD), Validity, Applicable Product, Applicable Customer, Reseller Name/Account, Billing Mode, and Remarks. The first row shows a coupon with a balance of 1,999,999.00 USD, valid from Jan 02, 2020 to Dec 31, 2023, applicable to all products and customers, with a 'Yearly/Monthly(Pay-per-Use)' billing mode. The second row shows a coupon with a balance of 999,999.00 USD, valid from Jan 02, 2020 to Dec 31, 2023, applicable to all products and customers, with a 'Yearly/Monthly(Pay-per-Use)' billing mode. The third row shows a coupon with a balance of 500.00 USD, valid from Sep 19, 2020 to Dec 31, 2029, applicable to ECPC Domains, with a 'Monthly(Pay-per-Use)' billing mode. The fourth row shows a coupon with a balance of 500.00 USD, valid from Sep 19, 2020 to Dec 31, 2029, applicable to ECPC Domains, with a 'Monthly(Pay-per-Use)' billing mode.

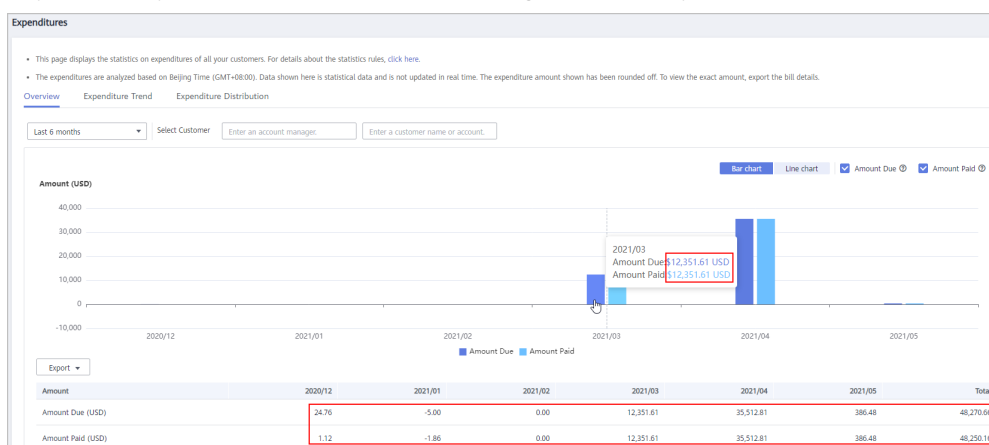

4. The amount of coupon value applied to bills is accurate to eight decimal places.
5. The amounts of list price, discounted amount, amount due, cash payment, cash coupons used, and monthly settlement on the **Expenditure Details** tab of the **Sales > Customers > Customer Expenditure** page are accurate to eight decimal places.

The screenshot shows the 'Expenditure Details' page. It has a search bar and a table with expenditure records. The table columns are: Transaction Time, ResourceID, Specifications, Region, AZ, List Price(USD), Discount Amo..., Amount Due(USD), Cash Payment..., Cash Coupons..., and Monthly Settle... The first row shows a transaction on Aug 11, 2024, for resource ID bandwidth-5420, with a list price of 0.10500000, a discount amount of 0.00000000, an amount due of 0.105, and a monthly settlement of 0.105.

- The amount of **Current Estimate** displayed when a monthly budget is set for a customer associated in the Reseller model on the **Sales > Customers > Customer Management** page is accurate to eight decimal places.

- The amount on the **Sales > Operations Statistics > Expenditures** page is rounded to the nearest hundredth. The amounts in the related APIs and exported expenditures are accurate to eight decimal places.

- Amounts in bill-related APIs and the subscribed bills on the **Support > Open APIs** page are accurate to eight decimal places.

There are 3 combination types:

- **Combined service:** Multiple instances are purchased and used together.

An example is as follows:

You placed a yearly/monthly subscription order for an ECS with the system disk, image, data disk, shared disk, EIP, and bandwidth resources added. A combined order is generated, including three resource types: an ECS (including images, system disk,s and data disks), shared disks, and VPCs (including EIPs and bandwidths). These three resource types are enabled independently, and each cloud service can be renewed, changed, or unsubscribed separately.

Resource type 1: ECS (including images, system disks, and data disks)

# 15 API

---

## 15.1 API Calling

### 15.1.1 How Do I Handle the Error APIG.0308?

If error message "The throttling threshold has been reached: policy user over ratelimit,limit:XX,time:1 second","error\_code":"APIG.0308" is returned when you call an API, it means that the number of concurrent requests have exceeded the service limit. Each service has a concurrency limit, for example the most concurrent requests that a service can process may be XX per second.

You can use the following two methods:

1. Check the code to see if there is a concurrency issue, and if there is, wait for about 2 to 5 seconds to resend the request.
2. Check the backend information to confirm if the results of the previous requests were returned before sending more requests.

If you need to support higher levels of concurrency, contact us at [Presales Support](#).

## 15.2 Fine-Grained Authorization

### 15.2.1 What Can I Do If the Error Code CBC.0151, Was Returned After I Added the Condition Key, `billing:cloudServiceType`?

The following shows an example of a policy containing the condition key, `billing:cloudServiceType`.

```

1  {
2    "Version": "5.0",
3    "Statement": [
4      {
5        "Effect": "Allow",
6        "Action": [
7          "billing:*:*"
8        ],
9        "Condition": {
10         "ForAllValues:StringEquals": {
11           "billing:cloudServiceType": [
12             "hws.service.type.ebs"
13           ]
14         }
15       }
16     ]
17   }
18 }

```

**NOTE**

Currently, the **billing:cloudServiceType** condition key only supports the action, **billing:subscription:unsubscribe**.

Details of error code, **CBC.0151**, are shown as follows:

```

{
  "error_code": "CBC.0151",
  "error_msg": "user access denied.checkCustomerPermission,correct permission code is billing:order:view"
}

```

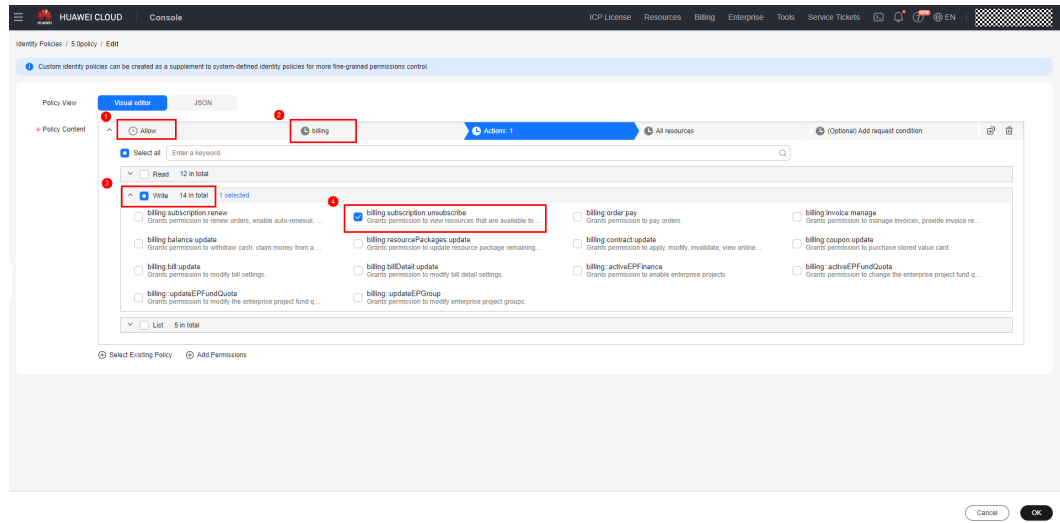

You can resolve this issue by:

Separating **billing:subscription:unsubscribe** and **billing:cloudServiceType** from other actions.

**Step 1** Log in to the new console.

**Step 2** Modify the policy content to separate the **billing:subscription:unsubscribe** action from other actions.

Set policy items based on the following picture.

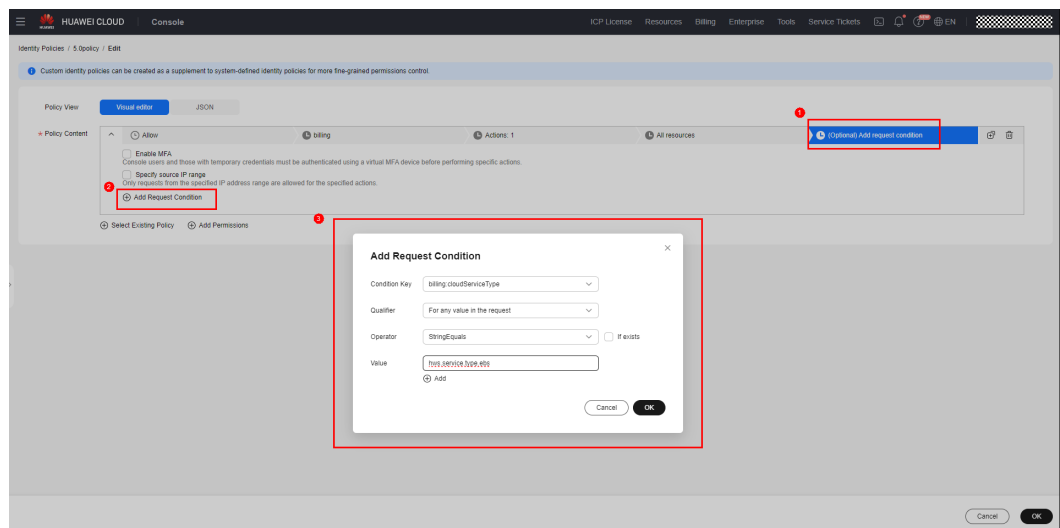

### Step 3 Add the `billing:cloudServiceType` condition key.

Click **(Optional) Add request condition** > **Add Request Condition**. Configure the condition parameters:

Condition Key: `billing:cloudServiceType`

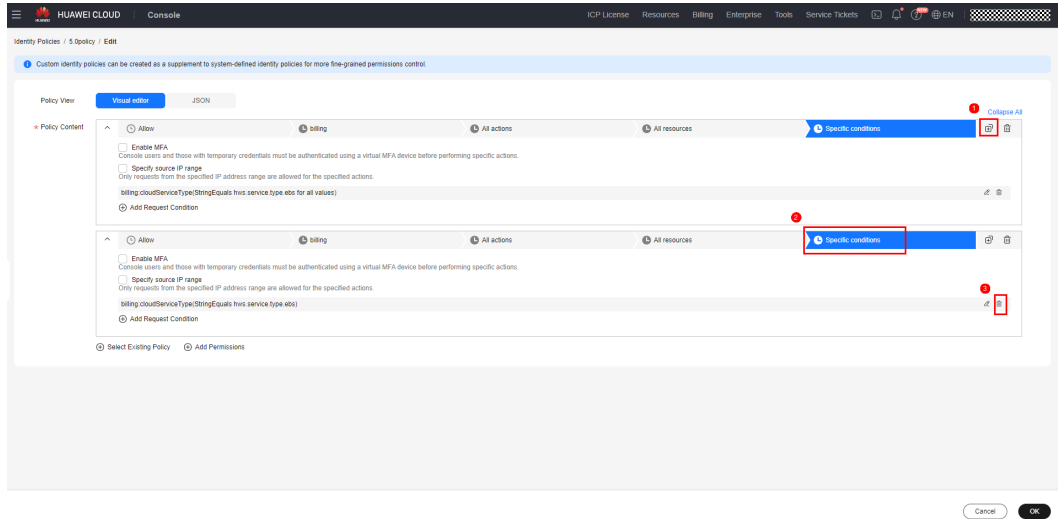

Operator: `StringEquals`

Value: `hws.service.type.ebs`

### Step 4 Add other actions.

Click the icon on the right side of **Specific conditions**. Delete the `billing:cloudServiceType` condition key.

Deselect **billing:subscription:unsubscribe** and click OK.
