1 Service Termination Policy Function Will Be Taken Offline

Huawei Cloud CDN will take the service termination policy function offline on March 6, 2024 UTC+08:00. The following table lists the logic difference when the retention period starts before and after the change.

Table 1-1 Process of handling domain names

Before March 6, 2024	After March 6, 2024
<p>If your account is in arrears and the retention period starts, CDN will execute the termination policy you set:</p> <ul style="list-style-type: none"> Disable domain name: CDN changes the status of your domain names to Disabled and stops CDN acceleration. The domain names cannot be accessed but their configurations are retained (until the retention period ends). After you pay off the outstanding amount, CDN will enable acceleration for them. Redirect to origin server: All requests to your domain names are redirected to the primary origin servers. CDN changes the status of your domain names to Disabled and stops CDN acceleration. CDN retains the domain name configurations (until the retention period ends). After you write off the outstanding amount, requests for the domain name will be forwarded to CDN PoPs for acceleration. <p>NOTE</p> <ul style="list-style-type: none"> After a domain name is terminated for 30 days, CDN no longer provides the redirect service, and the domain name cannot be accessed. 	<p>Disable domain name: CDN deletes the CNAME resolution of your domain names. In this case, the domain names cannot be accessed.</p> <p>NOTE</p> <p>If the service termination policy is set to Redirect to origin server before the change, CDN will continue to execute this policy after the change. To modify the policy, submit a service ticket.</p>

Service recovery method: After you pay off the outstanding amount and your account balance is sufficient, CDN automatically enables acceleration for your domain names.

2 Huawei Cloud CDN Will Verify the Ownership of All Domain Names

To prevent domain names from being maliciously added, Huawei Cloud CDN will verify the ownership of all domain names connected to CDN for the first time from April 18, 2024 00:00 (GMT+08:00). You can verify your domain names in advance by referring to [Verifying the Domain Name Ownership](#).

3 Huawei Cloud CDN Will Add a Log Field

To provide customers with richer access logs, Huawei Cloud CDN will add the 14th log field, server IP address, in late May 2024. For details, see [Log Management](#).
