1 Version Planning

This section describes the version support mechanism of Huawei Cloud Meeting clients.

Version Description

The version number is in the format of a.b.c, where:

- *a* indicates the major version number, which is updated yearly or when the version architecture is reconstructed.
- *b* indicates the monthly development version number, whose value is incremented by 1 every month.
- *c* indicates the release version number, whose value is incremented as a new patch version is released. The value starting with 5 indicates the first release version number.

Example version number: 8.12.5

Version Lifecycle

By default, a major version is released every one to two months, or a version is released based on customer requirements.

Version Constraints

None. The old and new versions are compatible.
