4	Prohibiting Object Preview with a Shared Link Containing Bucket Domain Name	Others	October 19, 2023

# 2 Notice on Setting Bucket Policies or ACLs to Private By Default During OBS Bucket Creation on Huawei Cloud

---

Dear customer,

On February 26, 2025, OBS will start gradually rolling out a Block Public Access function for buckets in different regions. If this function is enabled, the bucket policy or ACL cannot be set to be public by default during bucket creation for security purposes. With this function, public access is not allowed and public objects cannot be uploaded to the bucket. If you want to allow public access, you can disable the Block Public Access function when or after creating a bucket. To check which regions support the Block Public Access function, see [Function Overview > Block Public Access](#). For details about using this function, see [User Guide](#) or [API Reference](#).

If you have any questions or suggestions, [submit a service ticket](#) or call us at +86-4000-955-988 or +86-950-808.

We apologize for any inconvenience and appreciate your understanding. Thank you for using Huawei Cloud.
