# 1 Overview

Content Moderation provides services through open application programming interfaces (APIs). You can obtain the inference results by accessing and calling APIs in real time. It helps you collect key data automatically and build an intelligent business system, thereby improving service efficiency.

Currently, Content Moderation is in commercial use. You can choose either pay-per-use billing or discount packages. For details about Content Moderation pricing details, see [Product Pricing Details](#).

**Table 1-1** Content Moderation billing items

Billing Item	Description
Image Moderation-Antiporn API calls	<p>You are charged for the selected subservice. For details, see <a href="#">Product Pricing Details</a>. Two billing modes are available for each subservice:</p> <ul style="list-style-type: none"> <li>• <b>Pay Per Use</b></li> <li>• Yearly/Monthly package</li> </ul> <p>For details about the preceding billing modes, see <a href="#">Billing Modes</a>.</p>
Image Moderation-Political Figure API calls	
Image Moderation-Politics & Terrorism API calls	
Text Moderation API calls	
Distortion Correction API calls	
Image Clarity Detect API calls	
Image Moderation Porn API calls	

# 2 Billing Mode

---

The pay-per-use and discount package billing modes are available.

## Pay-per-Use

Content Moderation adopts tiered pricing based on the number of API calls. The tiered API calls are accumulated by calendar month. After a calendar month ends, the API calls are cleared. During the promotion period, you can make a specific number of API calls free of charge each month. .

### NOTE

- An API call is counted only when it succeeds. Remaining free API calls will be cleared by the end of the month.
- Billing rule: tiered pricing based on the number of API calls. The tiered API calls are accumulated by calendar month. After a calendar month ends, the API calls are cleared.
- Billing cycle: an hour. Fees are deducted from your account within one hour of the billing cycle expiration (subject to the system).

## Discount Package

After you subscribe to a discount package, the fee is deducted from the discount package quota. The fee beyond the quota is settled in pay-per-use mode. Compared with the pay-per-use mode, this mode offers larger discount and is recommended for long-term users. .

 **NOTE**

- Packages are paid in full, take effect immediately upon payment, and become unavailable upon expiration. Currently, you cannot specify the date when the package takes effect. For example, if you purchase a one-year discount package on January 1, the package automatically expires on January 1 in the next year. The validity period will not be extended and the fees cannot be refunded even though you have not made any API calls in the year.
- Packages can be subscribed to multiple times and can be used together.
- The fees for API calls can be deducted from the discount package quota only when the API calls are made within the validity period of the discount package. The excess part is billed in pay-per-use mode.
- The fees for API calls beyond the discount package quota are settled in pay-per-use mode according to tiered pricing. For example, if you have purchased a Text Moderation package of 1 million API calls in the current month and made 2.25 million API calls after the package took effect, the fee you need to pay is calculated as follows: \$1,044 (package fee) + (1,500,000 - 1,000,000) x \$0.0013 + (2,250,000 - 1,500,000) x \$0.00092 = \$2,384.

# 3 Billing Scenarios

---

If you subscribe to a Content Moderation package of 1 million API calls at 09:00:00 on August 5, 2018, make 60,000 API calls from 00:00:00 on August 1, 2018 to 09:00:00 on August 5, 2018, and make another 2 million API calls from 09:00:00 on August 5, 2018 to 23:59:59 on August 31, 2018, the fees you need to pay for the API calls used in August are calculated as follows:

Fees before package subscription:  $1,000 \times 0 + 59,000 \times \$0.0013 \text{ USD} = \$76.7 \text{ USD}$

Package fee: \$1,044 USD

Fees for API calls beyond the package quota charged in pay-per-use mode:  
 $(1,500,000 - 1,000,000 - 60,000) \times \$0.0013 \text{ USD} + (2,060,000 - 1,500,000) \times$   
 $\$0.00092 \text{ USD} = \$1,087.2 \text{ USD}$

Total:  $\$ 76.7 \text{ USD} + \$1,044 \text{ USD} + \$1,087.2 \text{ USD} = \$2,207.9 \text{ USD}$

# 4 FAQ

---

## What Are the Constraints on Concurrent API Calls?

Image Clarity Detect: By default, the maximum number of concurrent API calls is 1.

Distortion Correction: By default, the maximum number of concurrent API calls is 1.

Image Moderation: By default, the maximum number of concurrent API calls is 5.

Higher concurrency requires extra fees. You can submit a [service ticket](#) to increase concurrency if necessary.
