1 Service Process..... 1

1 Service Process

Global SIM Link (GSL) provides cellular IoT data bound to IoT devices and a data management platform that allows users to query data and manage SIM cards, enabling one-click access and global reachability.

1. **Confirm solution**

Before using GSL, ensure that the modules and network standard used by your devices support GSL.

2. **Register Huawei Cloud account**

[Register](#) a Huawei Cloud account and complete enterprise [real-name authentication](#).

3. **Subscribe to SIM card plans**

Purchase data plans for SIM cards. Select SIM card plans that match your modules, network standard and SIM card type, and confirm the order amount.

4. **Power on devices in specified areas**

After the SIM cards are inserted into devices and powered on, they automatically attach to the carrier's network. Devices authenticated by the carrier can then use data.
