# 1 Getting Started with Common Practices

If you use other security services, such as Web Application Firewall (WAF), Host Security Service (HSS), and Anti-DDoS, SA provides a series of practices that can help you better meet security requirements.

**Table 1-1** Common practices

Practice	Description
<a href="#">Security Panels</a>	SA can work with other security services and display overall cloud asset security posture in real time on SA security panels.
<a href="#">Enable SA to Get Improved Login Password Security</a>	Once a weak password is obtained by an attacker, the attacker can directly log in to the system and read or even modify website code. A weak password will put your system and services at serious risk. It is recommended that complex passwords be used and changed periodically to improve password security.  This topic walks you through how to improve password security and introduces some common methods to change weak passwords.
